PROFILE

I am a full-stack web developer with 1.5 years of experience, gained through learning and project development at my institute. In my portfolio, you'll find a variety of projects showcasing my skills in frontend and backend development using languages such as HTML, JavaScript, and Asp.Net Core etc.
Portfolio URL: https://subhan-01.github.io/Personal_portfolio/

WORK EXPERIENCE

○ **Responsive Single Page Web Development Project**
Aptech Garden
Creating a single-page application and responsive website entails crafting a user interface with various pages and menus, offering a selection of activities. It's imperative to design these elements in an aesthetically pleasing manner, incorporating attractive fonts, colors, and animations. Furthermore, ensuring responsiveness across devices is crucial. This project will utilize HTML, CSS, and JavaScript to achieve these goals.

○ **E-COMMERCE Web Application**
Aptech Garden
Jenny, a budding entrepreneur working from home, has established a thriving venture in cosmetics and imitation jewelry, initially relying on word-of-mouth through friends and relatives. With her customer base expanding rapidly, she now seeks to enhance her business footprint by developing a robust e-commerce website. Utilizing PHP, Laravel, and a frontend language, this project aims to elevate her online presence and streamline operations.

○ **Digital Survey Portal: Inspiring Environmental Action**
Aptech Garden
An educational institution is championing environmental awareness through free seminars and interactive student sessions. To reduce paper waste, they've tasked us with building a digital survey portal. Our goal: a user-friendly platform for surveys, student participation tracking, and rewarding top performers. This initiative aims to inspire environmental action. We'll use ASP.NET Core and SQL for this project.

EDUCATION

○ **Higher Diploma in Software Engineering**
2022 - Present
Aptech Garden Campus

○ **Inter In Computer Science**
20022 - 2024
Islamia Science Collage
